NOTE

These are suggestions, not requirements. Use your own presets, your own AI workflow, or none at all — what matters is the final 10-12 seconds.

Neoclassic Look & Feel

Suggested palette and type direction for the theme — again, optional.

TRAJAN PRO

The classic "Roman/classical" title font — carved-stone feel for headlines.

Cinzel

Elegant engraved-stone look — strong alternative for titles and stamps.

Playfair Display

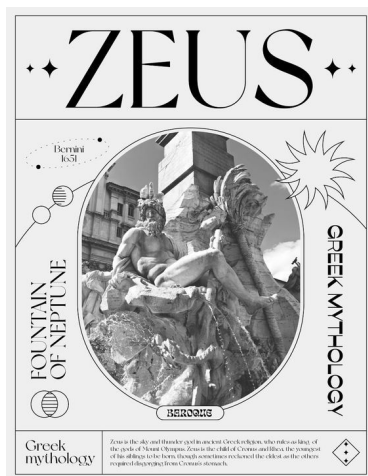

Modern serif with classical elegance — good for subtitles/captions.

EB Garamond

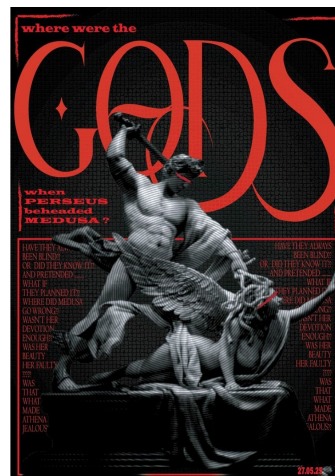

Historic body-text feel — for smaller on-screen text.

Reference Moodboard

Visual tone references for the Neoclassic theme — pull whatever style direction resonates.

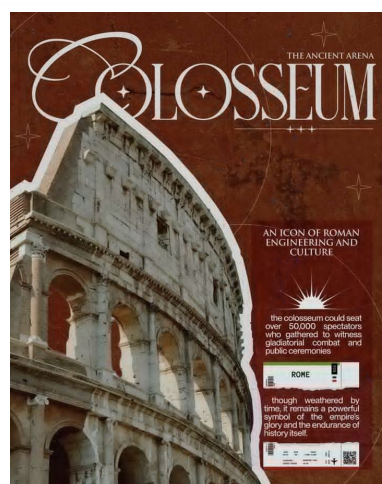

Editorial poster layout — statue + info-card composition

Bold typography over classical sculpture — high drama

Cinematic lighting, ornate character styling

Roman architecture, warm tone, documentary poster feel

Now go edit.
